***Extremely Urgent:
Execution of Daniel Lee Bedford***

16th May, 2011

Dear Mr. Wiinberg,

I write further to my letter of the 13th May regarding Daniel Lee Bedford, who is scheduled to be executed using Lundbeck drugs in Ohio on Tuesday.

Mr. Bedford, as you know, suffers from a range of neurological and psychiatric disorders. I have discussed his case with a number of neurologists; like me, they are shocked and appalled that drugs manufactured by Lundbeck – a company which is dedicated to improving the lives of people who, like Mr. Bedford, suffer from neurological and psychiatric disorders – should be used to kill him.

You have stated publically that you do not approve of the use of your product in executions; indeed, that your mission is to ‘improve people’s lives’ not to end them. I therefore ask that you review Mr. Bedford’s medical records and supply him with Lundbeck drugs which would improve his quality of life, rather than those necessary to end it.

To begin with, I might propose:

Clobazam for seizures
Ebixa for dementia
Depixol for psychosis
Cipramil or Fluvoxol for depression

You are the experts, however, and may think that other Lundbeck drugs are more suitable for his conditions; I leave this decision to your professional
